

Excerpt from [redacted] Diary, 22 April 1958

I/F A [redacted] I/F A [redacted] A [redacted] came in to discuss Defector [redacted] the use of sodium pentothol, truth serum, to be injected into the subject next week end by one of Dr. [redacted] needle artists. This raised a question as to whether or not we had a firm requirement for establishing [redacted] bonafides. This is not included in old [redacted] and has never been done by Contact Division in this country. Mr. [redacted] said that he would get in touch with [redacted] and [redacted] the idea being that [redacted] as Defector Coordinator would place a requirement on GJ for establishment of bonafides and, after this, I would request Medical to do the necessary with the needle. Mr. [redacted] talked to [redacted] and telephoned me later to say that [redacted] was going to ask staff to establish the bonafides so I believe we are forcibly out of the needle business as far as the record is concerned even though it would be done at the [redacted] G

cc: Chief, Contact Division
